Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the Issue Fee.

The following sentence has been inserted before the first line on page 1 of the specification:

-- This application is a division of Application 09/974,585, filed on 10/10/2001. --

Reasons For Allowance

The present invention is a method for controlling variable inlet guide vanes on the compressor of a gas turbine engine, the method including a provision for changing vane opening/closing schedules under certain conditions. Vane control systems with means for changing vane positioning schedules are in fact known in the prior art. None of the references of record however show or fairly suggest a system which operates according to the claimed method characterized by a normal mode vane opening/closing schedule, an alternative mode vane opening/closing schedule having vane settings more closed than the normal schedule for low compressor speeds, and a provision for rapidly moving

the vanes from the more closed settings of the alternative mode schedule to settings more open than those of the normal mode when accelerating the engine from low power levels. The claimed guide vane control method is therefore considered patentable over the art of record.
